# Whitfert Material Safety Data Sheet MAP

## STATEMENT OF HAZARDOUS NATURE

Not classified as hazardous according to criteria of WorkSafe Australia

## COMPANY DETAILS

<b>Company</b>	Whitfert
<b>Address</b>	54 Beach Street Kwinana
<b>Telephone Number</b>	(08) 9419 9999
<b>Emergency Telephone Number</b>	1800 654 089 (Not 24 Hours: 7am–5pm)

## IDENTIFICATION

<b>Product Name</b>	Monoammonium Phosphate
<b>Other Names</b>	Primary Ammonium Phosphate, MAP
<b>Product Code</b>	No Product Code allocated
<b>U.N. Number</b>	No UN number allocated
<b>Dangerous Goods Class</b>	No Dangerous Goods Class allocated
<b>Subsidiary Risk</b>	No Subsidiary Risk allocated
<b>Hazchem Code</b>	No Hazchem Code allocated
<b>Packing Group</b>	No Packing Group allocated
<b>Poisons Schedule Number</b>	No Poisons Schedule Number allocated
<b>Use</b>	Fertiliser

## PHYSICAL DESCRIPTION/PROPERTIES

<b>Appearance</b>	White crystalline anhydrous, odourless
<b>Boiling Point</b>	N/A
<b>Melting Point</b>	190 deg C
<b>Vapour Pressure</b>	N/A
<b>Specific Gravity</b>	N/A
<b>Flash Point</b>	N/A
<b>Flammability Limits</b>	N/A
<b>Solubility in Water</b>	650 g/l (25 deg C)

## OTHER PROPERTIES

<b>Corrosiveness</b>	N/A
<b>Reactivity With Common Substances</b>	N/A
<b>Solubility in organic solvents</b>	Not soluble in acetone or alcohol
<b>Ph of 10% solution</b>	4.41 (1% solution)
<b>Bulk Density</b>	Relative density: 1.803 Begins to decompose at 120 deg C

## INGREDIENTS

Major		
Chemical Entity	Proportion (%wt/wt)	C.A.S. No.
Monoammonium Phosphate	99% minimum	7722-76-1

Minor		
Chemical Entity	Proportion (%wt/wt)	C.A.S. No.

Date of Issue: April 2015

## MAP

### HEALTH HAZARD INFORMATION

HEALTH EFFECTS – ACUTE -	
<b>Swallowed</b>	Ingestion may cause severe irritation of mouth and digestion system.
<b>Eye Contact</b>	Contact with solution may injure eyes.
<b>Skin Contact</b>	Contact with skin will result in irritation.
<b>Inhaled</b>	Inhalation of dust will result in respiratory irritation
<b>HEALTH EFFECTS – CHRONIC – Irritant to skin. Severe irritant to eyes, permanent damage to occur.</b>	

FIRST AID	
<b>Swallowed</b>	If swallowed, give water to drink. Do not induce vomiting. Seek medical assistance. A physician or Poison control Centre can be contacted for advice. Wash heavily contaminated clothing before reuse..
<b>Eye Contact</b>	If contact with eyes occurs, immediately irrigate with copious quantities of water for at least 10 minutes. Eyelids to be held open. Seek immediate medical assistance.
<b>Skin Contact</b>	Wash with soap and water. Remove contaminated clothing and shoes. Wash clothing before re-use.
<b>Inhaled</b>	Remove to fresh air. If no breathing, give artificial respiration. If breathing is difficult, give oxygen. Obtain medical attention.
<b>First Aid Facilities</b>	Treat symptomatically based on judgement of doctor and individual reactions of patients.
<b>Advice to Doctor</b>	Treat symptomatically

### PRECAUTIONS FOR USE

<b>Exposure standards</b>	There are no specific exposure limits available.
<b>Engineering controls</b>	Provide natural or mechanical ventilation to minimise exposure, If practical use local mechanical exhaust ventilation at sources of air contamination such as open process equipment.

### PERSONAL PROTECTION

<b>Respirator type (AS 1716)</b>	Appropriate respirators may be full face piece or a half mask air-purifying cartridge respirator with particulate filters, self contained breathing apparatus in the pressure demand mode, or a supplied air respirator.
<b>Eye protection</b>	Chemical safety glasses can be worn to help prevent contact with the eyes.
<b>Glove type</b>	PVC gloves can be worn to prevent skin contact.
<b>Clothing</b>	Long sleeve shirt buttoned to the top and long trousers to help prevent skin contact, with rubber boots.
<b>Personal Hygiene</b>	Ensure clothing is washed and personal protective equipment replaced or washed before reuse if contaminated. Wash hands and face after handling and before work breaks when

	handling food, smoking or toilet breaks, etc.
--	---

<b>FLAMMABILITY</b>	
<b>Fire Hazards</b>	Monoammonium Phosphate Fertilisers are not flammable and do not support combustion.

<b>SAFE HANDLING INFORMATION</b>
----------------------------------

<b>STORAGE &amp; TRANSPORT</b>	
<b>Location</b>	Store in a well ventilated, cool and dry area. Contact with moisture must be avoided for it can cause handling difficulty. Ensure machinery is cleaned thoroughly after use, do not leave in machinery overnight.
<b>Storage incompatibilities</b>	Store away from oxidizing agent, alkalis, nitrates, hypochlorites, metallic powders, strong acids and permanganates.
<b>Dangerous Goods class</b>	No Dangerous Goods Class Allocated
<b>Subsidiary Risk</b>	No Subsidiary Risk Allocated
<b>Special Transport Requirements</b>	Keep away from oxidizing agent, alkalis, nitrates, hypochlorites, metallic powders, strong acids and permanganates.

<b>SPILLS AND DISPOSAL</b>	
<b>Minimising Spill / leak</b>	Spills should be swept and cleaned up immediately. Prevent run off into water ways and drainage systems.
<b>Clean Up Methods</b>	Depending on the size of the spill, clean up will involve sweeping up and loading into a truck or container. All material should be gathered up and shovelled into approved waste containers for later disposal move containers from spill area. Wash residue with water. Keep out of sewers and storm drains. Dispose of contaminated product and material. Review national, regional and local government requirements prior to disposal.
<b>Precautions for Clean Up Crew</b>	Clean Up crew should wear P2 type dust masks, PVC gloves, chemical safety goggles and long sleeve shirts and trousers.
<b>Specialised Equipment for Clean Up</b>	Depending on the size of the spillage, a front end loader may be required for clean up.

<b>FIRE AND EXPLOSION HAZARD</b>	
<b>Hazards of use / storage</b>	When Monoammonium Phosphate Fertilisers and alkalis are mixed together Ammonia may be released. A spontaneously explosive mixture may be formed if mixed with swimming pool chlorine, for example calcium hypochlorite and sodium hypochlorite.
<b>Dangerous Decomposition or Combustion Products</b>	When heated to decomposition, oxides of nitrogen, oxides of phosphorous and ammonia may be expelled.
<b>Fire Fighting recommendations</b>	Monoammonium Phosphate Fertilisers are not combustible.
<b>Types of Extinguishers</b>	Monoammonium Phosphate Fertilisers are not combustible.
<b>Fire Fighting Agents</b>	Monoammonium Phosphate Fertilisers are not

	combustible.
<b>Hazchem Code</b>	No Hazchem Code allocated for Monoammonium Phosphate Fertilisers.

## OTHER INFORMATION

No Other Information available.

## CONTACT INFORMATION

Organisation	Location	Person	Telephone

## DISCLAIMER

As the ordinary or otherwise use(s) of this product is outside the control of Whitfert, no representation or warranty, expressed or implied, is made as to the effect (s) of such use(s), (including damage or injury), or the results obtained. Users of the product should ensure they read this Material Safety Data Sheet and endeavour to understand the information in regard to how the product will be handled and used in the work place, particularly in conjunction with other products. This Material safety Data Sheet summarises our best knowledge of the health and safety hazard information of the practices involved in safely handling the product in the work place. If Additional information or further explanations of safety procedures are required to take the appropriate safety precautions, the handler can contact Whitfert on (08) 9419 9999.
