# Whitfert Material Safety Data Sheet Sulphate of Potash

## STATEMENT OF HAZARDOUS NATURE

Not classified as hazardous according to criteria of WorkSafe Australia

## COMPANY DETAILS

<b>Company</b>	Whitfert
<b>Address</b>	54 Beach Street Kwinana
<b>Telephone Number</b>	(08) 9419 9999
<b>Emergency Telephone Number</b>	1800 654 089 (Not 24 Hours: 7am–5pm)

## IDENTIFICATION

<b>Product Name</b>	Sulphate of Potash
<b>Other Names</b>	Potassium Sulphate, SOP, dipotassium sulphate
<b>Product Code</b>	No Product Code allocated
<b>U.N. Number</b>	No UN number allocated
<b>Dangerous Goods Class</b>	No Dangerous Goods Class allocated
<b>Subsidiary Risk</b>	No Subsidiary Risk allocated
<b>Hazchem Code</b>	No Hazchem Code allocated
<b>Packing Group</b>	No Packing Group allocated
<b>Poisons Schedule Number</b>	No Poisons Schedule Number allocated
<b>Use</b>	Fertiliser, general purpose food additive

## PHYSICAL DESCRIPTION/PROPERTIES

<b>Appearance</b>	Clear to white hard odourless crystals or white powdered solid
<b>Boiling Point</b>	1689 °C at 100 kpa
<b>Melting Point</b>	No data available
<b>Vapour Pressure</b>	No data available
<b>Specific Gravity</b>	2.66
<b>Flash Point</b>	No data available
<b>Flammability Limits</b>	No data available
<b>Solubility in Water</b>	12g per 100g of water @ 20 °c

## OTHER PROPERTIES

<b>Corrosiveness</b>	Mildly corrosive to iron, mild steel, zinc, copper and aluminium in the presence of moisture. Similar to common salt.
<b>Reactivity With Common Substances</b>	Incompatible with aluminium, magnesium or sodium sulphate and may explode in combination with these at temperatures exceeding 800 °c
<b>Solubility in organic solvents</b>	Not soluble in acetone or alcohol
<b>Ph of 10% solution</b>	3-4
<b>Bulk Density</b>	1.20 tonne/m <sup>3</sup>

# Whitfert Material Safety Data Sheet Sulphate of Potash

INGREDIENTS		
Major		
Chemical Entity	Proportion (%wt/wt)	C.A.S. No.
Dipotassium Sulphate	96.0%	7778-80-5
Potassium chloride	<4%	7447-40-7

## HEALTH HAZARD INFORMATION

HEALTH EFFECTS – ACUTE – Sulphate of Potash has a low toxicity. It is not classified as hazardous according to criteria of WorkSafe Australia.	
<b>Swallowed</b>	Low degree of toxicity via ingestion. In cases where large amounts are ingested there may be a reaction of nausea, diarrhoea and vomiting. LD <sub>50</sub> on rats, orally, greater than 6,600mg/ kg.
<b>Eye Contact</b>	Contact may cause mild irritation, in the form of redness, stinging and watering.
<b>Skin Contact</b>	Dust may dry out skin and cause irritation, itching and redness, especially if the skin has previously been exposed to abrasion. No harmful effects from skin absorption have been reported.
<b>Inhaled</b>	Mild irritant may cause irritation to the nose and upper respiratory tract when high concentrations of air-borne dust are present.
HEALTH EFFECTS – CHRONIC - There is no known effect from chronic exposure to Sulphate of Potash	

FIRST AID	
<b>Swallowed</b>	Providing the person is conscious wash out mouth with water and give water or milk to drink. Do not induce vomiting. Seek medical assistance, if a large quantity has been swallowed, or if there is difficulty swallowing or continued pain.
<b>Eye Contact</b>	Irrigate with water for 15 minutes immediately. If pain persists seek medical assistance.
<b>Skin Contact</b>	Wash off with plenty of water. Remove contaminated clothing and launder before using again.
<b>Inhaled</b>	Remove from exposure to a well-ventilated area. Keep warm and at rest. In emergency situations, if breathing is abnormal or difficult give oxygen. If the affected person suffers a cardiac arrest commence cardio-pulmonary resuscitation immediately. Seek urgent medical attention.
<b>First Aid Facilities</b>	Ensure drinking water and eye wash bottles are available when Sulphate of Potash Fertilisers are in regular use.
<b>Advice to Doctor</b>	Treat symptomatically

Date of Issue: April 2015

## PRECAUTIONS FOR USE

<b>Exposure standards</b>	There are no specific exposure limits available. Recommended ACGIH value for airborne concentrations of dust particles TLV/TWA -10mg/m <sup>3</sup> Nuisance dust.
<b>Engineering controls</b>	Use well ventilated areas. Avoid high dust concentrations.

## PERSONAL PROTECTION

<b>Respirator type (AS 1716)</b>	Avoid inhaling the dust by wearing class P2 type dust mask when necessary.
<b>Eye protection</b>	Chemical safety glasses can be worn to help prevent contact with the eyes.
<b>Glove type</b>	PVC gloves can be worn to prevent skin contact.
<b>Clothing</b>	Long sleeve shirt buttoned to the top and long trousers to help prevent skin contact.
<b>Personal Hygiene</b>	Ensure clothing is washed and personal protective equipment replaced or washed before reuse if contaminated. Wash hands and face after handling and before work breaks when handling food, smoking or toilet breaks, etc.

## FLAMMABILITY

<b>Fire Hazards</b>	Sulphate of Potash Fertilisers are not flammable and do not support combustion.
---------------------	---

## SAFE HANDLING INFORMATION

## STORAGE & TRANSPORT

<b>Location</b>	Store in a well ventilated, cool and dry area. Contact with moisture must be avoided for it can cause handling difficulty. Ensure machinery is cleaned thoroughly after use, do not leave in machinery overnight.
<b>Storage incompatibilities</b>	Store away from oxidisers, acids and food and drink. Violent explosions can occur when sulphate of potash is melted with aluminium.
<b>Dangerous Goods class</b>	No Dangerous Goods Class Allocated
<b>Subsidiary Risk</b>	No Subsidiary Risk Allocated
<b>Special Transport Requirements</b>	Keep away from oxidizing agent, acids and food products.

## SPILLS AND DISPOSAL

<b>Minimising Spill / leak</b>	Spills should be swept and cleaned up immediately. Prevent run off into water ways and drainage systems.
<b>Clean Up Methods</b>	Depending on the size of the spill, clean up will involve sweeping up and loading into a truck or container. All material should be gathered up and disposed of.
<b>Precautions for Clean Up Crew</b>	Clean Up crew should wear P2 type dust masks, PVC gloves, chemical safety goggles and long sleeve shirts and trousers.
<b>Specialised Equipment for Clean Up</b>	Depending on the size of the spillage, a front end loader may be required for clean up.

FIRE AND EXPLOSION HAZARD	
<b>Hazards of use / storage</b>	Sulphate of potash is a relatively inert product. Ensure good house keeping and storage practices are followed. Keep away from moisture as it can cause handling problems.
<b>Dangerous Decomposition or Combustion Products</b>	If Sulphate of Potash is heated above 1066 degrees Celsius it may emit toxic oxides of sulphur.
<b>Fire Fighting recommendations</b>	Sulphate of Potash is not combustible.
<b>Types of Extinguishers</b>	Sulphate of Potash is not combustible.
<b>Fire Fighting Agents</b>	Sulphate of Potash is not combustible.
<b>Hazchem Code</b>	No Hazchem Code allocated for Sulphate of Potash.

## OTHER INFORMATION

No Other Information available.

### DISCLAIMER

As the ordinary or otherwise use(s) of this product is outside the control of Whitfert, no representation or warranty, expressed or implied, is made as to the effect (s) of such use(s), (including damage or injury), or the results obtained. Users of the product should ensure they read this Material Safety Data Sheet and endeavour to understand the information in regard to how the product will be handled and used in the work place, particularly in conjunction with other products. This Material safety Data Sheet summarises our best knowledge of the health and safety hazard information of the practices involved in safely handling the product in the work place. If Additional information or further explanations of safety procedures are required to take the appropriate safety precautions, the handler can contact Whitfert on (08) 9419 9999.
