

Whitfert Material Safety Data Sheet

Monoammonium Phosphate - Ammonium Sulphate Potassium Chloride Based Fertilisers

Date of Issue: June 2020
Page 1 of 5

STATEMENT OF HAZARDOUS NATURE

Not classified as hazardous according to criteria of WorkSafe Australia

COMPANY DETAILS

Company	Whitfert
Address	54 Beach Street Kwinana
Telephone Number	(08) 9419 9999
Emergency Telephone Number	1800 654 089 (Not 24 Hours: 7am–5pm)

IDENTIFICATION

Product Name	Whitboost, Whitboost Extra and Whitboost TE.
Other Names	As above
Product Code	No Product Code allocated
U.N. Number	No UN number allocated
Dangerous Goods Class	No Dangerous Goods Class allocated
Subsidiary Risk	No Subsidiary Risk allocated
Hazchem Code	No Hazchem Code allocated
Packing Group	No Packing Group allocated
Poisons Schedule Number	No Poisons Schedule Number allocated
Use	Fertiliser

PHYSICAL DESCRIPTION/PROPERTIES

Appearance	Partially granulated fertilisers with wide variations in colour, mainly pale to dark brown and red. Can emit an ammoniacal odour.
Boiling Point	No data available
Melting Point	No data available
Vapour Pressure	No data available
Specific Gravity	No data available
Flash Point	No data available
Flammability Limits	No data available
Solubility in Water	No data available

OTHER PROPERTIES

Corrosiveness	Mildly corrosive to iron, mild steel, brass, zinc, copper and aluminium.
Reactivity With Common Substances	Reactive with oxidizing agents, alkalis, sodium hypochlorites and strong acids. If contacted with alkalis, ammonia gas may be released. Explosive nitrogen trichloride may form, if contact with chlorinating agents such as sodium hypochlorite or calcium hypochlorite. If strong acids make contact with these fertilisers toxic hydrogen chloride gas may be produced; toxic nitrosyl chloride may also be produced as a result of contact with hot nitric.
Solubility in organic solvents	Not soluble in acetone or alcohol
Ph of 10% solution	3.0 - 5.0
Bulk Density	1.0 – 1.10 tonne/m ³

Whitfert Material Safety Data Sheet

Monoammonium Phosphate - Ammonium Sulphate Potassium Chloride Based Fertilisers

Date of Issue: June 2020

INGREDIENTS			
Major			
Chemical Entity	Proportion (%wt/wt)	C.A.S. No.	
Potassium chloride	Less than 25%	7447-40-7	
Ammonium Sulfate	Less than 30%	7783-20-2	
Monoammonium Phosphate	Less than 60%	7722-76-1	
Diammonium Phosphate	30% or Less	7783-28-0	
Minor			
Chemical Entity	Proportion (%wt/wt)	C.A.S. No.	
Copper Oxide	Less than 6%	1317-38-0	
Zinc Oxide	Less than 6%	1314-13-2	
Coating agent	Less than 1%		

HEALTH HAZARD INFORMATION

HEALTH EFFECTS – ACUTE - Monoammonium Phosphate - Ammonium Sulphate and Potassium Chloride based Fertilisers have a low toxicity. It is not classified as hazardous according to criteria of WorkSafe Australia.	
Swallowed	Low degree of toxicity via ingestion. In cases where large amounts are ingested there may be a reaction of nausea, diarrhoea and vomiting. LD ₅₀ on rats, orally, greater than 2,000mg/ kg (Monoammonium Phosphate, Diammonium Phosphate), (Ammonium Sulphate) 3000mg/kg, (Potassium Chloride) 2,600 mg/kg.
Eye Contact	Contact may cause mild irritation, in the form of redness, stinging and watering.
Skin Contact	Dust may dry out skin and cause irritation, itching and redness, especially if the skin has previously been exposed to abrasion. No harmful effects from skin absorption have been reported.
Inhaled	Mild irritant may cause irritation to the nose and upper respiratory tract when high concentrations of air-borne dust are present.
HEALTH EFFECTS – CHRONIC - There is no known effect from chronic exposure to Monoammonium Phosphate Ammonium Sulphate and Potassium Chloride based Fertilisers.

FIRST AID	
Swallowed	Providing the person is conscious wash out mouth with water and give water or milk to drink. Do not induce vomiting. Seek medical assistance, if a large quantity has been swallowed, or if there is difficulty swallowing or continued pain.
Eye Contact	Irrigate with water for 15 minutes immediately. If pain persists seek medical assistance.
Skin Contact	Wash off with plenty of water. Remove contaminated clothing and launder before using again.
Inhaled	Remove from exposure to a well-ventilated area. Keep warm and at rest. In emergency situations, if breathing is abnormal or difficult give oxygen. If the affected person suffers a cardiac arrest commence cardio-pulmonary resuscitation immediately. Seek urgent medical attention.
First Aid Facilities	Ensure drinking water and eye wash bottles are available when Monoammonium Phosphate Ammonium Sulphate and Potassium Chloride based Fertilisers are in regular use.
Advice to Doctor	Treat symptomatically

PRECAUTIONS FOR USE

Exposure standards	There are no specific exposure limits available. Recommended ACGIH value for airborne concentrations of dust particles TLV/TWA -10mg/m ³ Nuisance dust.
Engineering controls	Use well ventilated areas. Avoid high dust concentrations.

PERSONAL PROTECTION

Respirator type (AS 1716)	Avoid inhaling the dust by wearing class P2 type dust mask when dust is present.
Eye protection	Chemical safety glasses can be worn to help prevent contact with the eyes.
Glove type	PVC gloves can be worn to prevent skin contact.
Clothing	Long sleeve shirt buttoned to the top and long trousers to help prevent skin contact.
Personal Hygiene	Ensure clothing is washed and personal protective equipment replaced or washed before reuse if contaminated. Wash hands and face after handling and before work breaks when handling food, smoking or toilet breaks, etc.

FLAMMABILITY

Fire Hazards	Monoammonium Phosphate Ammonium Sulphate and Potassium Chloride based Fertilisers are not flammable and do not support combustion.
---------------------	--

SAFE HANDLING INFORMATION

STORAGE & TRANSPORT	
Location	Store in a well ventilated, cool and dry area. Contact with moisture must be avoided for it can cause handling difficulty. Ensure machinery is cleaned thoroughly after use, do not leave in machinery overnight.
Storage incompatibilities	Store away from oxidizing agent, alkalis, chlorinating agents: eg swimming pool chlorine, alkalis and strong acids as they can react with the fertiliser and form oxides of phosphorous and sulphur.
Dangerous Goods class	No Dangerous Goods Class Allocated
Subsidiary Risk	No Subsidiary Risk Allocated
Special Transport Requirements	Keep away from alkalis, chlorinating agents: eg swimming pool chlorine and strong acids.
Precautions for Clean Up Crew	Clean Up crew should wear P2 type dust masks, PVC gloves, chemical safety goggles and long sleeve shirts and trousers.

SPILLS AND DISPOSAL	
Minimising Spill / leak	Spills should be swept and cleaned up immediately. Prevent run off into water ways and drainage systems.
Clean Up Methods	Depending on the size of the spill, clean up will involve sweeping up and loading into a truck or container. All material should be gathered up and disposed of.
Precautions for Clean Up Crew	Clean Up crew should wear P2 type dust masks, PVC gloves, chemical safety goggles and long sleeve shirts and trousers.
Specialised Equipment for Clean Up	Depending on the size of the spillage, a front end loader may be required for clean up.

FIRE AND EXPLOSION HAZARD	
Hazards of use / storage	When Monommonium Phosphate Ammonium Sulphate and Potassium Chloride based Fertilisers relatively inert.
Dangerous Decomposition or Combustion Products	When heated to decomposition, oxides of phosphorous and sulphur may be released, as well as ammonia gas.
Fire Fighting recommendations	Monommonium Phosphate Ammonium Sulphate and Potassium Chloride based Fertilisers are not combustible.
Types of Extinguishers	Monommonium Phosphate Ammonium Sulphate and Potassium Chloride based Fertilisers are not combustible.
Fire Fighting Agents	Monommonium Phosphate Ammonium Sulphate and Potassium Chloride based Fertilisers are not combustible.
Hazchem Code	No Hazchem Code allocated for Monommonium Phosphate Ammonium Sulphate and Potassium Chloride based Fertilisers.

DISCLAIMER

As the ordinary or otherwise use(s) of this product is outside the control of Whitfert, no representation or warranty, expressed or implied, is made as to the effect (s) of such use(s), (including damage or injury), or the results obtained. Users of the product should ensure they read this Material Safety Data Sheet and endeavour to understand the information in regard to how the product will be handled and used in the work place, particularly in conjunction with other products. This Material safety Data Sheet summarises our best knowledge of the health and safety hazard information of the practices involved in safely handling the product in the work place. If Additional information or further explanations of safety procedures are required to take the appropriate safety precautions, the handler can contact Whitfert on (08) 9419 9999.
