

# Whitfert : Big Bag Recovery

Whitfert Fertilisers has partnered with Big Bag Recovery, which enables bulka-bags to be dropped off for recycling collection at our depot.

## What is Big Bag Recovery?

Big Bag Recovery is designed to assist in the recycling of large plastic packing bags, such as bulka-bags.

Recycling ensures that these products do not enter the waste stream or land fill.

Recycled products range from shipping pallets, plastic furniture and garden pots and ensures an end of life product from these single use bags.

## What do you need to do?

Whitfert Fertilisers has partnered with Big Bag Recovery, this enables used bulka bags to be returned for recycling at the Whitfert Fertiliser depot.

All Whitfert Fertiliser Bulka Bags are single use bags, we recommend that they are not reused once emptied.

When you purchase Whitfert Fertilisers in a bulka bag, you will be able to return your empty bags for recycling.

Empty bags can be returned to the Whitfert Fertilisers depot.

## Depot Collection Point

Whitfert Fertilisers – Kwinana - 54 Beach Street, Kwinana Beach, 6167

### Disclaimer:

No discount or refund is available through this program. Recycling costs ONLY are covered by Whitfert Fertilisers and no other associated costs. There should be no expectation from the customer returning the bulka-bag that they will be compensated for any part of the return process.
